Dublin
European Green Party

Title:	**AM-32-1 to B-R7: Nature Restoration Law vs. EU plan for critical raw materials - challenges to protect nature and food sovereignty**
Tabled by:	Vihreät - De Gröna

Draft text

From line 32 to 36:

Some projects connected to Europe's green transition and digital transformation ~~–~~are associated with an unsustainable model of overconsumption and overexploitation of raw materials~~ are far removed from plans for the~~. Sustainable transition has to place prevention and precaution at the forefront of productive and technological solutions.

Explanation / Comment

It would be more pertinent to focus on the projects and policies leading to overconsumption, instead of associating all of green transition and digital transformation to these practises.
