

1
2 **More than Ever: Let's Make Our Future Green and Fair**

3
4 In ~~2024~~, the 2024 European Parliament elections, the European Greens ran on a message of
5 courage. Because courage is
6 exactly what our politics is about right now.

7 The world in 2024 is very different from 2019. The pandemic, the wars in Ukraine
8 and the Middle East, and deep democratic and social crises changed the world we
9 live in. The green transition has accelerated significantly, both in Europe and globally. But the need
10 for a continued and strengthened fight for nature and climate is evident on the backdrop of
11 alarming reports from the IPCC record temperatures and accelerating natural disasters. More than
12 ever, we need ambitious answers that can meet the challenges
13 of our times.

14 We fought the European election with our most far-reaching campaign ever, and we
15 have not stopped since. Building up to the elections, we put more energy than
16 ever before into expanding the Green family, seizing the green transition as a
17 chance to build a more just society, and strengthening our alliances with
18 movements and civil society.

19 The European election results were mixed for the Green family. Overall, the Green family
20 experienced a loss of seats in the European Parliament compared to the previous legislature,
21 largely due to significant setbacks in several countries. Additionally, far-right parties gained ground
22 in many EU member states. However, green parties made notable advances in countries where
23 they had previously been either underrepresented or largely absent. The past five years, along with
24 the 2024 campaign and election, offer valuable lessons and opportunities for progress for the
25 European Green Party and the future of our political project. ~~Breakthroughs in~~
26 ~~many countries were tempered by major losses in others and rising far-right~~
27 ~~forces. But, I~~

28 Looking beyond the numbers, the foundations for future green
29 victories have been built. These advances are the starting points for the next
30 five years:

31 While there are still inequalities in representation, tThe Green family elected MEPs from
32 more EU countries than ever before. The
33 Greens are now far better represented in southern and eastern Europe, and Baltics, a
34 development that strengthens and enriches us.

35 Campaigning on a Green and Social Deal, we put forward our offer of a
36 green transition based on social justice. Making Green parties across the ~~case that green~~
37 ~~policies improve lives~~ EU have strengthened their narratives and raised awareness of the
38 inseparability of social and green policies ~~protect livelihoods can convince voters.~~

- 39 □ The far right is beatable. At the EU level, we exposed far-right agenda and fought to to
40 keep them out of the majority~~While their gains are shocking, the far right is beatable. At the~~
41 ~~EU~~
42 ~~level, we exposed its agenda and applied the pressure necessary to keep~~
43 ~~Meloni's far right of the majority.~~ In the Nordics, the Netherlands and
44 Italy, we bounced back and showed that Greens and progressives can win.
- 45 □ We have strong allies across society. We built and maintained close ties with civil
46 society, from green and social NGOs to trade unions and businesses supporting the green
47 businesses transition.
48 During the campaign, they recognised our platform's strength and strongly
49 supported our priorities.
- 50 □ In the campaign leading up to the 2024 election, we faced several important challenges
51 that should serve as key areas for us to focus on in the years to come:
- 52 □ Unlike in 2019, setting the agenda on climate and environmental issues was less
53 prominent. Despite the urgency of climate disruption, there is no more mass mobilization in
54 the streets around environmental issues. Also, electoral debates were framed around
55 economic issues of immediate and individual concern, with purchasing power dominating
56 electoral discussions all over the EU.
- 57 □ At the same time, Green parties are no longer the sole advocates for environmental issues.
58 In many European countries, we now face competition from parties that have integrated
59 climate policies into their platforms. Greens must work to ensure that our message
60 remains distinct, relevant, and credible.

61 After the elections, Commission President Ursula von der Leyen achieved a
62 majority with our support based on a clear promise to defend the EU European
63 Green Deal and ensure a pro-European, democratic future for the EU. We urgently demand that the
64 European Commission upholds this decision.~~This promise~~
65 ~~must be upheld.~~ We strongly deplore that Ursula Von der Leyen offered the position of Vice-
66 president to a member of a post-facist party.

67 Unfortunately, we have already seen how many Conservatives in the European Parliament do not
68 share their own Commission President's line. They are playing a dangerous game flirting and
69 voting with the far right to form an alternative, illiberal majority. Their cooperation risks rolling ~~But~~
70 ~~the dangers of Conservative and far-right cooperation are growing. Part of~~
71 ~~the European People's Party is already working hand in hand with the far right~~
72 ~~to roll~~ back green and social legislation, gambling with human rights and
73 endangering self-determination. They will enable impunity for authoritarians
74 like Viktor Orbán, normalize Giorgia Meloni's post-fascist government, and
75 harden inhuman and failed migration policies. It is the same dangerous path that
76 has brought the far right to power in several member states.

77 As Greens, our role in this mandate is to hold the political forces leading the
78 European institutions to account and fight back against the right-wing drift embodied in the far

79 [right and parts of the European People's Party](#). By
80 taking responsibility in the election of the Commission president [Ursula von der Leyen](#), we have
81 showed~~n~~
82 ourselves ready to build bridges and compromise [to prevent far right ideology and discourses of](#)
83 [influencing EU politics as well as](#) to realise our positive agenda.

84
85 [The fight to reinforce the green transition will not be easy – but we are ready to assume leadership](#)
86 [and further advance the transition towards climate neutrality and healthy nature and environment](#)

87 ~~Against the threat of far-right influence, we are prepared to support an~~
88 ~~alliance of the democratic centre but if and only if it can also advance our~~
89 ~~political priorities and deliver for people and planet.~~ Throughout the mandate,
90 we will fight for every opening to make progress on environmental protection,
91 social justice and fundamental rights and democracy, [guided by a postgrowth thinking, while](#)
92 [combating any backlash on the Green Deal and the rule of law achievements](#). Outside of the
93 institutions, we will be building our movement at every level of power and in
94 every European country.

95 [Lately, the international fora \(G20, COP29, Plastic Pollution Treaty\) have shown that, if international](#)
96 [diplomacy is still alive, the agreements tremendously lack ambition.](#)

97 Over the next five years, the key fights for the European Greens at all levels
98 will be:

- 99 Defending [and developing](#) the European Green Deal and backing it with common European
100 and
101 national [regulation and](#) public investment that strengthens ~~economic~~ prosperity and
102 protects our societies. ~~from the climate crisis, the increasingly severe effects of the climate~~
103 ~~and biodiversity crises.~~ [We will support businesses to implement the Green Deal and](#)
104 [secure future investment and jobs.](#)
- 105 [Fighting for ambitious international treaties that step up our actions against the climate,](#)
106 [biodiversity loss, pollution and resources crises.](#)
- 107 [Ensuring the green transition in all aspects – including responsible and circular use of](#)
108 [resources, elimination of chemical pollution, healthy and sustainable agriculture and food](#)
109 [production, nature restoration and implementation of the Montreal protocol](#)
- 110 Improving daily lives by strengthening ~~green~~ public services like social
111 housing and public transport, [by ensuring affordable green energy](#) and European
112 protections for social rights
- 113 Standing up for fundamental rights and the rule of law wherever they are
114 under threat: in the European Union, at our borders, and anywhere in the
115 world
- 116 Building long-term peace and security by welcoming new members and
117 reforming the EU so it can take decisions effectively and become a

118 credible international actor

119 Looking at the challenges ahead of us, we will need ~~to fight~~ more [courage](#) than ever [to fight](#) for
120 our green future. There is no ignoring the many crises European societies face.

121 Many people are struggling to get by after hard years of the pandemic, energy
122 crisis, and economic downturn. The severity of the climate and environmental
123 crisis is unrelenting. 2024 has been the hottest year on record and this autumn
124 has seen catastrophic flooding right across Europe, with an especially tragic
125 loss of life in the Valencia region. [This is why the agenda of the European Green Deal needs to be
126 strengthened in order to invest massively in renewable energy and energy infrastructure, the
127 circular economy, biodiversity and zero pollution solutions.](#)

128 With the Russian invasion of Ukraine, war returned to Europe, threatening
129 freedom and security across the continent. There can be no turning our backs on
130 Ukraine. It is fighting for freedom and its future lies in the European Union. [Russia is using ecocide
131 as a weapon of war and must bear full responsibility for that. To address this, we must urgently
132 develop scientifically grounded methods for calculating the damages caused by ecocide,
133 ensuring accountability and enabling effective restoration efforts.](#)

134 As Greens, we support continued economic ~~VOTE on AM 51. and military~~ aid to Ukraine and
135 future

136 EU membership [and long-term support for Ukraine's resilience, economic development,
137 sustainable reconstruction and the rule of law.](#) ~~Our assistance to Ukraine must enable a climate-
138 resilient
139 reconstruction, built on renewable energy, modern infrastructure, and a
140 sustainable and inclusive economy. Our support to Ukraine must ensure its future
141 prosperity and should take the form of grants not loans.~~ [We must also support democratic forces
142 that are targeted by Russian propaganda outside of the EU, such as Georgia, Moldova and Serbia,
143 ensuring we do as much as we can for EU candidate countries.](#)

144 The explosion of violence in the Middle East is a further reminder of the horror
145 of war, the fragility of the international system and the need for the European
146 Union to step up in world politics. After the re-election of Donald Trump, we
147 stand in solidarity with everyone in the United States and globally threatened
148 by his authoritarian agenda, [his plutocratic government and his climate change denialism.](#) ~~In a
149 world of fear, the European Union must become
150 a beacon of hope and move forward towards more unity, ambition and alliances
151 with other parts of the world.~~

152 For everybody who wants an ambitious European Union that answers these
153 challenges and keeps the far right out of power, the European Greens are there
154 to represent them. As a European political party, we will build on our
155 achievements and set out a new vision for the future of our societies and the
156 European project.

157 This effort will be built together with the many actors who are fighting to make
158 a fair and just green transition a reality and defeat the rise of the far right.

159 We will also strengthen our cooperation with youth movements and continue to
160 invest in our networks connecting Greens at the local level.

161 As Greens, we believe that the just and fair green transition is our future. A
162 greener society will be a more just society, with expanded public services,
163 affordable energy bills, and healthier surroundings. We represent the conviction
164 that it is not only possible but achievable and desirable. Step by step, a
165 greener, fairer society that protects the rights of all can be built. [As Greens, we are calling for a just
166 transition directive.](#)

167
168 As the constructive pro-climate, pro-European democratic force, we are there to
169 advance this green project, for the European Union as at every level of
170 political power.

171 If we stand united with our partners, a majority for the green transition,
172 social justice, and a united European future is achievable. It is achievable in
173 society, in every member state, and in the European Union as a whole.

174 [We ran elections on courage, because we need courage to face the challenges of our times.](#) Over
175 the next five years, we will not stop fighting for it. The future is green [and fair](#).

176
