## TETIANA BODUN

## PARTIJA ZELENYKH UKRAINY

**Dear colleagues!**

I am Tetiana Bodun.

I have been in the Green Movement for half my life.

For half my life I have been fighting for the implementation of our ideas in the lives of my people and European democratic values in my country.

I represent  Partija Zelenykh Ukrainy and a country that is currently fighting for its democracy, freedom and independence against a nuclear-armed Russia.

I represent a country that has voluntarily surrendered its nuclear arsenal under the security guarantees of the Nuclear Club. We, the Ukrainian Greens, have worked hard to convince the ruling establishment and the people that this was the right thing to do. And now we have a war. The plot did not follow our green scenario, but the scenario of the past.

This terrible war is not only against Ukraine but against the entire free world. A war of the past and the future, of dictatorship and democracy.

The purpose of this war is to break the existing world order. Because of the global

movement towards a just peace on the planet, real steps towards an ecological balance of life on Earth, prevent totalitarian states from building their autocratic world.

The success of the right-wing forces in Europe is evidence not only that our voters are tired and disillusioned, but also that Moscow is working continuously and steadily to undermine and discredit our European values, especially our Green values.

It is bribery and blackmail, cyberattacks and information manipulation, and instrumentalisation of migration. This is direct funding and even the creation of pro-Moscow parties, gross interference in the most valuable thing in our democracy - elections.

Today, this is the most serious threat to democratic Europe since the 1930s. We need to realise this.

We do not have to look for the problem of losing the electorate in revising our ideological foundations. Voters are directly affected by a coordinated hybrid campaign to split European society, destabilising and weakening the EU. In this process, Moscow is investing billions of dollars earned from the sale of fossil fuels.

That is why I decided to run for the committee.

We will not allow anyone to weaken the Greens, to sow fear and disbelief.

We must unite today for the sake of the future and the sake of our planet.

Please support me

**Kind regards,**
