MOTIVATION LETTER

My motivation is very simple: my main goal of life is a strong green party in Lithuania and also in Eastern Europe. As a member of Parliament and government coalition I have a necessary position and experience to boost green ideas across the region. My experience in implementing social reforms, reduction of poverty is unique and necessary for the Greens to find voters not only in urban, but also in rural areas. As a politician who has very strong positions for human rights, I am an example for others not to hide in the grass and vote for important decisions. I have a dream of helping to build strang green movement in Ukraine.
