

Title: **AM-85-1 to B-R6: Transitioning to sustainable and resilient farming systems in Europe**

Tabled by: PROGRESÍVIE

Draft text

Insert from line 84 to 85:

not, for instance, support the continued production of water-intensive crops in water-stressed areas. **The Common Agricultural Policy (CAP) must prioritize sustainable farming practices and ensure its tools are designed to maintain the number of small and medium-sized farms, promoting generational renewal and rural vitality.**
