

**Title:** AM-62-1 to B-R6: Transitioning to sustainable and resilient farming systems in Europe

**Tabled by:** Groen

#### **Draft text**

**From line 62 to 66:**

~~Yet, agriculture has significant potential for adaptation with multiple beneficial resilience effects for entire communities and society as a whole, by transitioning to low input sustainable agricultural practices which regeneratively use rather than deplete natural resources.~~ Agriculture has a great potential for adaptation. The need to develop a resilient food system is higher then ever. Transitioning to low input sustainable agriculture would extensively benefit local communities and society as a whole. For instance, increasing and managing soil fertility and biodiversity reduces the need for
