

Title: AM-83-1 to B-R6: Transitioning to sustainable and resilient farming systems in Europe

Tabled by: Groen

Draft text

From line 82 to 85:

for strengthening ecosystem services. Ensure subsidies are resource efficient, regional specific and contribute to long-term resilience. ~~Public money should not, for instance, support the continued production of water-intensive crops in water-stressed areas.~~ The current CAP needs to be audited from a sustainability perspective. Subsidies that clearly harm the environment, our health and safety, need to be stopped, such as subsidies for water intensive crops in water stressed regions.

Explanation / Comment

- improves readability and makes our demands more precise
