

Title: AM-22-1 to B-R6: Transitioning to sustainable and resilient farming systems in Europe

Tabled by: Miljöpartiet de gröna

Draft text

From line 21 to 26:

Despite this, EU policy has failed to rebalance European agriculture and diets to become more plant based. ~~Although 70% of arable land in the EU is dedicated to feed production for animals, this still only covers 30% of the feed required for current levels of meat production.~~ Although 70% of agricultural land in the EU is dedicated to feeding livestock this still does not meet the total demand for animal feed.. The remaining feed is imported, making meat consumption and production also subject to vulnerable world markets. Comparing
