**Insert from line 19 to 20:**

- The European People's Party is doing the far right's dirty work by undermining climate protection, social rights justice, rule of law and democratic principles. The constant lies and democracy denial at both national and European level play a massive role in citizens' distrust towards the democratic institutions.

**Explanation / Comment**

In some cases, at both European and National level, political parties including the EPP ones are undermining the role of the justice system and attack judges directly for simply doing their job whenever a government or a parliament member abuse the system or break the law. (including when the situation of a far-right representative is on the line). Moreover, the strategic use of lies as well as denying some basic democratic principles to citizens are record-breaking high.
