

Title: AM-61-1 to R2: Green solutions for more crisis-prepared, resilient and safer societies

Tabled by: Bündnis90/Die Grünen

Demands

From line 60 to 63:

8. Demands investment in cybersecurity and the information landscape. These need to be safeguarded through investment in[Space] independent, open-source digital infrastructure to defend our democratic institutions ~~from~~against manipulation and cyber threats[Space]._i[Space]without compromising civil rights. The EU must adapt public procurement procedures to ensure investments in European companies and networks, thereby decreasing dependencies on the US and other countries with weak safeguards for data and customer protection.

Explanation / Comment

More concrete demand for fewer dependencies.
