

Title: **AM-70-2 to R2: Green solutions for more crisis-prepared, resilient and safer societies**

Tabled by: Ecolo

Demands

Insert from line 69 to 70:

9. dignity, freedom, democracy, equality, the rule of law, and respect for human rights.

10. Demands the EU to reinforce the RescEU wildfire fleet through more resources and greater cooperation and solidarity between Member States. The EU must possess a supranational wildfire fleet to intervene quickly in case of large wildfires unmanageable by Member States alone. These waterbombing aircrafts should be built in Europe to feed the demand for European products and stimulate the European industry, we call on local requirement criteria in public procurement.

Explanation / Comment

Prevention is always the best policy. However, it is not always possible. Given the fact that the EU is facing stronger wildfires summer after summer, quicker and more efficient interventions are needed to protect our forests. To do so, we must be better equipped and prepared at the supranational level.
