

**Title:** **AM-60-2 to R3: Shifting Europe's Transport Infrastructure Towards Sustainability and Justice: The European Rail Network at the Centre**

**Tabled by:** Groen

### **Demands**

**Delete in line 60:**

~~—The immediate end to night flights~~

### **Explanation / Comment**

We believe that the resolution needs to be reconciled with the current economic and logistical realities of the day, especially the supply chains of our most essential industries (pharmaceuticals, production of industrial devices and parts, etc.) where such rapid, affordable and reliable means of transporting them by land (rail) are not yet available. While such alternatives to night deliveries by air are not yet available, we must not immediately take the available options away from our industries and continue to work with them towards more sustainable solutions which improve the health and quality of life of our people who live near airports.
