

## **Application: EGP Representative in the Global Greens Coordination**

Dear Greens,

I'm applying to be one of your representatives for the Global Greens Coordination.

In a world full of conflicts, a world in which fascism aims for power in so many different countries while democracy seems to be retreating, and a world that is facing the climate crisis global solidarity is extremely crucial.

I am fully convinced of the potential of an organisation as the Global Greens, which could have the power to grow the Green movement globally. To connect Greens across continents. Which could be a space to learn from each other, grow together and stand in solidarity against authoritarian forces, against deniers of the climate crisis.

This belief is what brought me into the Steering Committee of the Global Young Greens where I have been serving first as treasurer (2020 – 2023) and since 2023 as one of the two first-ever Co-Spokespersons.

During those five years I learned a lot. About myself, about Greens in different places but also about the structures and challenges of the Global Greens.

In the past five years I worked on improving the collaboration between the Global Young Greens and Global Greens but also had the chance to support the organisation of the Global Greens' congress as a volunteer.

In both of this I gained a lot of insights in the dynamics between the different federations, inside the GG structures and into the processes in and around Global Greens.

I really wish to pass on this knowledge and feed it into the work of the EGP representatives inside the Global Greens Coordination. I do think that this experience I bring into the work is a valuable addition.

## **Application: EGP Representative in the Global Greens Coordination**

The Global Greens are just now going through a restructuring process. I would like to support this process and do my part to build resilient structures that are able to leverage the potential the Global Greens as an organisation could have.

Through five years on the Global Greens Steering Committee, 14 years of experience in political work on different levels of the Green Party in Germany, and years as active FYEG member I bring a lot of structural knowledge and understanding to the table.

I supported the Global Young Greens in restructuring their Steering Committee, improving their statutes and also build meaningful collaborations with other youth organisations who work globally.

But I also gained knowledge about long-standing challenges inside the Global Greens. Knowledge that could be useful in the work inside the Global Greens Coordination.

I would also like to further contribute to strengthening the relationship between the Global Young Greens and the Global Greens. The collaboration hasn't always been easy. I would like to be part of working on this relationship and do think it is valuable to know how GYG works, what are their challenges and fears to be able to mediate in future discussions about a potential closer collaboration.

I would be honoured if you put the trust in me to work on strengthening the Global Greens as an organisation that has great potential.

Warm regards,

Liliane Viola Pollmann
