Title:	**AM-36-1 to Res 3.: Climate Adaptation Against Inequalities**
Tabled by:	Federation of Young European Greens

From line 36 to 38:

Adaptation must be based on functioning ecosystems~~: public investment should prioritise innovative nature-based solutions, whereas the private sector can complement these efforts.~~.Public investment should prioritise the protection and restoration of forests, wetlands, rivers, peatlands, soils and marine ecosystems as essential climate adaptation infrastructure. Nature-based solutions must respect ecological limits, support biodiversity and avoid treating nature as a commodity. Private investment can complement, but must not replace, public responsibility.

Explanation / Comment

Though ecosystems are mentioned, the most vulnerable types are not, though forestry is mentioned in the demands.
Private investment is a means to an end, but we also need our governments and civil society to put in the work, instead of risking monopolies.
