Title:	**AM-40-2 to Res 3.: Climate Adaptation Against Inequalities**
Tabled by:	Ecolo

From line 40 to 42:

Heat: guarantee free drinking water and accessible and affordable cooling ~~spaces;~~spaces such as outdoor pools; introduce heat health plans; enforce temperature thresholds and ~~compensation~~guarantee income for ~~outdoor workers~~all exposed workers, indoor and outdoor, when work is unsafe; adapt school and office schedules and invest in insulation, cool

Explanation / Comment

Cooling spaces such as pools but also museums, public librairies, etc. are often hard to find in some isolated neighborhoods. Moreover, some applies entrance fees that low-income households cannot pay.
Heat at work does not only impact outdoor workers. We could see last summer the difficult conditions some workers have found themselves in warehouses, kitchens, workshops and schools. Finally, "compensation" can be up to interpretation to whom shall be responsible for supporting the worker's income. Mentionning an income guarantee could give more security against a possible income loss.
