Title:	**AM-40-3 to Res 3.: Climate Adaptation Against Inequalities**
Tabled by:	Bündnis90/Die Grünen

From line 40 to 43:

Heat: guarantee free drinking water and cooling spaces; introduce heat health action plans; enforce temperature thresholds and compensation for outdoor workers when work is unsafe; adapt ~~school~~ **school, work and ~~office~~public event schedules to heatwaves**[Space]and invest in insulation, cool ~~roofs~~ **roofs, sustainable cooling**and green spaces.

Explanation / Comment

Uses the established term "heat-health action plans", extends schedule adjustments to work and public events, and adds sustainable cooling so that adaptation does not drive up energy demand through inefficient air conditioning.
