Title:	**AM-6-10 to Res 3.: Climate Adaptation Against Inequalities**
Tabled by:	Les Écologistes - Europe Ecologie Les Verts

Insert from line 6 to 7:

Mitigation remains indispensable, but adaptation can no longer be postponed. The financial cost of inaction will far exceed the preventive investments required, making adaptation an absolute economic necessity.Climate change amplifies inequalities: wealthier people and businesses can buy

Explanation / Comment

Highlighting the cost of non-adaptation is crucial to justify the urgency of action from an economic standpoint, which is essential to counter the right-wing narrative that ecological measures are "too expensive".
