Title:	**AM-16-2 to Res 3.: Climate Adaptation Against Inequalities**
Tabled by:	Les Écologistes - Europe Ecologie Les Verts

Insert from line 15 to 17:

The agricultural sector is facing declines in yields, changes in growing areas and new pests and diseases. Extreme temperatures do not only affect human health; they also impact animals —particularly livestock — and the entire ecosystem.. Floods, such as Storm DANA in Valencia, Spain, and landslides in Sicily, have caused severe losses and damage.

Explanation / Comment

It is important to mention diseases (in addition to pests) as well as the direct impact of extreme temperatures on livestock and entire ecosystems, not just on human health.
