Title:	**AM-71-1 to Res 3.: Climate Adaptation Against Inequalities**
Tabled by:	Les Écologistes - Europe Ecologie Les Verts

Demands

From line 71 to 73:

• Support for climate-resilient livelihoods~~, such as agriculture, forestry, tourism, reinforcing agricultural methods and traditional knowledge of shared land use~~ in sectors such as agriculture and livestock farming, forestry, tourism, accompanying the adaptation of agricultural practices and the equitable sharing of resources, especially land and water, and promoting traditional knowledge

Explanation / Comment

This clarifies the sectors concerned (by explicitly including livestock) and replaces a vague wording on agricultural methods with concrete support for adapting practices and ensuring the equitable sharing of land and water.
