31st Council
10-13 June 2020
Online
by the European Greens

Title:	**AM-33-1 to Res 5.: Green Data Centres for Europe: Climate-Safe and Sovereign**
Tabled by:	Vihreät - De Gröna

Insert from line 32 to 33:

requirements, effective monitoring and fair allocation of the costs of infrastructure and environmental impacts.

Environmental impact evaluation legislation and monitoring are falling behind the rapid development as shown in the cutting down of 800 hectares of forest without proper permitting in connection to Google's data centre project in Northern Finland. Development of large data centres in undeveloped or remote areas can have a significant impact on local nature through landscape and ecosystem changes, and heat released.
