Title:	**AM-37-1 to Res 5.: Green Data Centres for Europe: Climate-Safe and Sovereign**
Tabled by:	Federation of Young European Greens

From line 36 to 43:

to gas turbines, and China, where coal still dominates. Its first building block ~~is flexibility~~must beflexibility: all data centres ~~that~~should be equipped to shift non-urgent workloads to hours of surplus wind and solar and to use their batteries to support the grid ~~stop competing with~~, avoiding competitionwith households and industry for scarce grid capacity ~~and can connect~~, thereby connecting sooner – without making electricity more expensive for everyone else. Its second ~~is sovereignty~~must besovereignty: data centres open to foreign authorities do not become European by sitting on European soil – they must be built, owned and run by ~~Europeans~~the people of Europe, with strong data protection and cybersecurity.
