

**Title:** **AM-106-1 to S 5.2: Draft 2024 Manifesto -  
CHAPTER I: The Courage to Put Planet and People  
First – Our Green and Social Deal for Europe**

**Tabled by:** Europe Ecologie - Les Verts

**Draft text**

**Insert from line 105 to 106:**

renewable energy, energy efficiency and energy savings. No European or member state public money should go towards fossil infrastructure. Epecially, the deployment of green hydrogen should not benefit fossil fuels industries for exemple oil refining or fertilizer production. As green hydrogen will use part of the renewable electricity production capacity, public funding toward hydrogen infrastructure should be limited to direct use in heavy duty mobility, energy storage, green chemistry and RFNBOs production. The "polluter pays" principle must be implemented as soon as possible, particularly in the field of mobility. A number of measures need to be implemented as soon as possible, such as the taxation of parcels and Sport utility vehicles over 1.4 tonnes. Only by promoting soft, low-carbon mobility can we win the battle against climate change.
