Draft text

## From line 196 to 200:

We stand up against the devastating regression on <u>sexual and</u> reproductive rights all over the world. No one should be criminalized <u>for consensual adult sexual actions or</u> for seeking or accessing abortion services. Women must have <u>the right to bodily autonomy</u> including access to medical abortions. As Greens, we advocate the provision of free, highquality contraceptives for all <u>and sexual and reproductive health services accessible to all</u> including those in poverty and marginalised.[Space]
