

Amendments to S 5.2: Draft 2024 Manifesto - CHAPTER I: The Courage to Put Planet and People First – Our Green and Social Deal for Europe					
No	Lines	Tabled by	Original text	Proposed amendment	Explanation / comment
1	AM-1-98	SF - Green Left			We need to expand and be more explicit on the Greens emission reduction policies.
2	AM-57-7	SF - Green Left	Our societies are only as healthy and secure as the natural world on which they depend. We are facing the consequences of climate change today: more extreme weather events such as storms, droughts, and floods, rising sea levels,	<b>From line 57 to 59:</b>  <i>Our societies <del>are</del> <u>can</u> only <del>as</del> <u>be</u> healthy and secure <del>as</del> <u>if we respect the natural world on which they depend</u> <u>planetary boundaries.</u></i>	
3	AM-63-1	Bündnis9 0/Die Grünen	and our relatively peaceful and prosperous societies depends on us acting now. Protecting the climate and environment is about protecting people.	<b>Insert from line 62 to 63:</b>  and our relatively peaceful and prosperous societies depends on us acting now. Protecting the climate and environment is about protecting people.  <u>The Green transition towards a socially just and climate neutral Europe bears the promise of prosperity. We are working towards a better living environment and well paid, safe jobs in the heart of our economies. Europe is on the forefront of green technology development and innovation. Leading the green transition allows us to tap into that potential and reap the benefits of our inventive spirit. Instead of paying billions to autocracies to buy fossil fuels that are extracted and refined in third countries, we can invest this money in the production and installation of renewables, money and jobs that we keep in Europe and invest in a better future.</u>	

Amendments to S 5.2: Draft 2024 Manifesto - CHAPTER I: The Courage to Put Planet and People First – Our Green and Social Deal for Europe					
Nº	Lines	Tabled by	Original text	Proposed amendment	Explanation / comment
4	AM-65-5	SF - Green Left	Europe needs to face the climate crisis in its full urgency, reducing its emissions as rapidly as possible in line with scientific recommendations to secure the most liveable future possible for the years and decades ahead. At the same time, investing in a clean European economy and rapidly reducing our dependence on fossil fuels strengthens competitiveness and security.	<p><b>From line 65 to 69:</b></p> <p><del>Europe needs to face the climate crisis in its full urgency, reducing its emissions as rapidly as possible in line with scientific recommendations to secure the most liveable future possible for the years and decades ahead. At the same time, investing in a clean European economy and rapidly reducing our dependence on fossil fuels strengthens competitiveness and security.</del></p> <p><u>We stand at a turning point in history. The EU has a real opportunity to exceed it's own ambitious goals and be a global leader in the green transition. And the world needs such a leader, if we are to ensure a livable future for the planet, and turn the tide on the increasing number of floods, fires and droughts that we experience in Europe and even more in countries that have less resources to tackle the consequences.'</u></p>	
5	AM-69-1	Europe Ecologie - Les Verts	same time, investing in a clean European economy and rapidly reducing our dependence on fossil fuels strengthens competitiveness and security.	<p><b>From line 68 to 69:</b></p> <p>same time, investing in a clean European economy and rapidly reducing our dependence on fossil fuels strengthens <del>competitiveness</del><u>sovereignty</u> and security.</p>

These objectives should be set out in a revised EU climate law.</p>	

**Amendments to S 5.2: Draft 2024 Manifesto - CHAPTER I: The Courage to Put Planet and People First – Our Green and Social Deal for Europe**

№	Lines	Tabled by	Original text	Proposed amendment	Explanation / comment
13	AM-78-1	Europe Ecologie - Les Verts	and achieve full climate neutrality by 2040. These objectives should be set out in a revised EU climate law.	<p><b>Insert from line 77 to 78:</b></p> <p>and achieve full climate neutrality by 2040. These objectives should be set out in a revised EU climate law. <u>But as important as ambitious climate goals are, they should not be used to justify the use of geoengineering. In an European Union concerned about climate, these technologies, such as solar radiation modification, must be definitively banned and not used to achieve climate neutrality we are calling for.</u></p>	
14	AM-79-1	SF - Green Left	<b><i>Building a community of renewable energy</i></b>	<p><b>In line 79:</b></p> <p><b><i>Building a community of renewable energy</i></b>  <u><i>A transition building on renewable energy</i></u></p>	<b>Reason:</b> removed the term “community” in the headline and the first sentence. It is ambiguous (European community - or local energy communities) - which makes the message less clear. Also replaced the term: “economic key to the future” with “key to a future based completely on clean, renewable energy.”
15	AM-83-1	GroenLinks	than any other energy source, renewables helped the EU economy save 100 billion euros between 2021 and 2023 and bring down energy bills for households.	<p><b>Insert from line 82 to 83:</b></p> <p>than any other energy source, renewables helped the EU economy save 100 billion euros between 2021 and 2023 and bring down energy bills for households.  <u><b>At least 50% of ownership for renewable energy projects should be guaranteed local.</b></u></p>	One of our basic goals is to have bottom-up local influence and economy. Therefore, with the upcoming increase of sustainable energy production these units should be in the hands of “we, the people”. So, a certain percentage of such ownership should be officially guaranteed, only than is a real people's/prosumers network for sustainable energy possible; although preferably the percentage should be much higher.

Amendments to S 5.2: Draft 2024 Manifesto - CHAPTER I: The Courage to Put Planet and People First – Our Green and Social Deal for Europe					
No	Lines	Tabled by	Original text	Proposed amendment	Explanation / comment
16	AM-87-1	SF - Green Left	habitable planet, geopolitical independence from autocrats, and a resilient and democratically managed energy system.	<p><b>Insert from line 86 to 87:</b></p> <p>habitable planet, geopolitical independence from autocrats, and a resilient and democratically managed energy system.</p> <p><a href="#">We will accelerate the development of a robust electricity grid that can move green electricity to where it is needed and integrate backup storage and generation facilities that ensure robust delivery of power – also when the sun doesn't shine, and the wind doesn't blow.</a></p> <p><a href="#">The accelerated pace of development must not be at the expense of citizen involvement and nature protection, but hearings, investigations etc. have to be efficient to prevent slowing down the urgent transition.</a></p>	
17	AM-88-1	SF - Green Left	We want solar panels on every roof possible to put citizens at the heart of the energy transition giving them cheaper energy and control.	<p><b>From line 88 to 89:</b></p> <p>We want <del>solar panels on every roof possible</del> to put citizens at the heart of the energy transition giving them cheaper energy and control. <a href="#">We will enable solar panels on every roof possible, and support energy sharing and energy communities – adding local district heating systems, energy storage, EV charging.</a></p>	Mentioning only solar on rooftops is a too narrow statement on distributed energy production and energy communities.

Amendments to S 5.2: Draft 2024 Manifesto - CHAPTER I: The Courage to Put Planet and People First – Our Green and Social Deal for Europe					
No	Lines	Tabled by	Original text	Proposed amendment	Explanation / comment
18	AM-89-1	Verdes Equo	We want solar panels on every roof possible to put citizens at the heart of the energy transition giving them cheaper energy and control.	<b>Insert from line 88 to 89:</b>  We want solar panels on every roof possible to put citizens at the heart of the energy transition giving them cheaper energy and control. <a href="#">It is important to recognize the right and the need to replace the current centralized, corporate, and speculative system with one that prioritizes people, economic justice, and the planet, moving towards a transition with a 100% renewable, distributed, efficient, intelligent, and democratic energy system, involving new actors and services.</a>	
19	AM-94-1	Europe Ecologie - Les Verts	<b>Ending fossil fuels in Europe</b>	<b>Insert in line 94:</b>  <b><a href="#">Ending fossil fuels in Europe and aiming for carbon neutrality in 2040</a></b>	
20	AM-94-2	SF - Green Left	<b>Ending fossil fuels in Europe</b> The EU needs a clear plan for the total phaseout of fossil fuels: coal by 2030,	<b>Insert from line 94 to 95:</b>  <a href="#">We propose a total phaseout of fossil fuels;</a>	We need more than a plan.
21	AM-95-1	Bündnis90/Die Grünen	The EU needs a clear plan for the total phaseout of fossil fuels: coal by 2030, fossil gas by 2035, and oil by 2040. The energy crisis of 2022 cost Europe over 1 trillion euros between energy subsidies and inflated prices. We cannot afford	<b>From line 95 to 97:</b>  The EU needs a clear plan for the total phaseout of fossil fuels: <a href="#">in accordance with our climate goals, starting with</a> coal <del>by 2030, fossil gas by 2035, and oil by 2040</del> <a href="#">2030</a> . №	Lines	Tabled by	Original text	Proposed amendment	Explanation / comment
22	AM-99-1	SF - Green Left	The acceleration of the transition to renewables will bring economic, health and security benefits, while further delay will only lead to higher costs down the line.	<p><b>From line 99 to 101:</b></p> <p><del>The acceleration of the transition to renewables will bring economic, health and security benefits, while further delay will only lead to higher costs down the line.</del></p> <p><u>We will support a massive and accelerated electrification of all sectors, and ensure affordable energy for everybody. And we will provide help for those that cannot afford the initial investments to get through the transition and harvest the long run benefits.</u></p> <p><u>For roads and trucks electrification is the fastest and cheapest way to net zero. We need to support the development of cheap electric vehicles, charging infrastructure and good public transportation replacing cars and flights. Heating and cooling has been very dependent in fossil fuels – in particular natural gas. It is critical for the climate that we convert no later than 2035 – convert the remaining fossil heating in all homes and industries. In the long run this will result in cheaper and more stable heating – but many will need support for the initial investments. This is a top priority of the green and social deal. We have seen and fought numerous attempts to slow down the transition in road transportation and heating. Propagating alternatives to electrification like hydrogen and other e-fuels. They come with higher risks and are more polluting – and costlier for both consumers and the society. They should be reserved for heavy industry, long distance shipping and flights where electrification is not feasible. We will sharpen the targets and incentives for a green transition of the industry. Combined with the build out of carbon taxes (carbon border adjustment mechanism) this will ensure a strong green European industrial development.</u></p>	We need to expand and be more explicit on the Greens emission reduction policies. Further we need to be more specific about how we protect citizens in the transition – not least to counter the misinformation and watering down of the Fit for 55 regulations for cars and heating.
23	AM-102-1	SF - Green Left	Europe needs a plan to phase out all fossil fuels subsidies by 2025 at the latest, and all other environmentally harmful subsidies by 2027 at the latest. The billions of euros from fossil fuel subsidies must be channelled into renewable energy, energy efficiency and energy savings. No European or member state public money should go towards fossil infrastructure.	<p><b>From line 102 to 106:</b></p> <p><del>Europe needs a plan to phase out all fossil fuels subsidies by 2025 at the latest, and all other environmentally harmful subsidies by 2027 at the latest. The billions of euros from fossil fuel subsidies must be channelled into renewable energy, energy efficiency and energy savings. No European or member state</del></p> <p><u>We need to phase out all fossil fuels subsidies by 2025 at the latest To drive the change in a socially sustainable way, the billions of euros from fossil fuel subsidies and CO2 levies must be used to incentivize the green transition and ensuring that the transition is affordable for all. No European or memberstate</u> public money should go towards fossil infrastructure.</p>	We need more than a plan. Use of ETS revenues should be included in the “redirection” of funds. We should use the to incentivize the transition and ensuring it is affordable.

24	AM-105-1	Bündnis90/Die Grünen	The billions of euros from fossil fuel subsidies must be channelled into renewable energy, energy efficiency and energy savings. No European or member state public money should go towards fossil infrastructure.	<b>From line 104 to 106:</b>  The billions of euros from fossil fuel subsidies must be channelled into renewable energy, energy efficiency and energy savings. <del>No</del> <u>We need to phase out all</u> European or member state public money <del>should go that</del> <u>goes</u> towards fossil infrastructure.	
25	AM-106-1	Europe Ecologie - Les Verts	renewable energy, energy efficiency and energy savings. No European or member state public money should go towards fossil infrastructure.	<b>Insert from line 105 to 106:</b>  renewable energy, energy efficiency and energy savings. No European or member state public money should go towards fossil infrastructure. <u>Especially, the deployment of green hydrogen should not benefit fossil fuels industries for exemple oil refining or fertilizer production. As green hydrogen will use part of the renewable electricity production capacity, public funding toward hydrogen infrastructure should be limited to direct use in heavy duty mobility, energy storage, green chemistry and RFNBOs production. The "polluter pays" principle must be implemented as soon as possible, particularly in the field of mobility. A number of measures need to be implemented as soon as possible, such as the taxation of parcels and Sport utility vehicles over 1.4 tonnes. Only by promoting soft, low-carbon mobility can we win the battle against climate change.</u>	

**Amendments to S 5.2: Draft 2024 Manifesto - CHAPTER I: The Courage to Put Planet and People First – Our Green and Social Deal for Europe**

№	Lines	Tabled by	Original text	Proposed amendment	Explanation / comment
26	AM-111-1	Europe Ecologie - Les Verts	recent EU legislation, such as introduction of the “energy efficiency principle”, are major achievements. Now they must be fully implemented.	<p><b>From line 110 to 111:</b></p> <p>recent EU legislation, such as introduction of the “energy efficiency principle”, are major achievements. <del>Now they must</del> <u>However, these measures do not clearly differentiate between the distinct policies of sufficiency and efficiency. Sufficiency aims to reduce the consumption of energy and natural resources through changes in behavior, lifestyle and collective organization (fewer cars, more local and organic food, etc.). It differs from energy efficiency, which relies exclusively on technologies to reduce the energy consumption of a given object or system, without reflecting on its use. Above all, sufficiency is in line with the principles of social justice, since it encourages the capping of excessive consumption to respect planetary boundaries, while guaranteeing the energy consumption needed to meet basic needs. European sufficiency policies would therefore be fully implemented an appropriate way of tackling energy hoarding head-on, to protect the most vulnerable. For example, for transport, this means outlawing intra-EU air travel if reasonable rail alternatives exist, or capping vehicle tonnage. At the same time, it means financing cross-border infrastructure to enable high-quality rail and bicycle journeys. Taxation is also a lever: the EU could introduce a special higher rate for anti-environmental consumption and increase the level of the reduced rate for essential goods.</u></p>	
27	AM-129-1	Europe Ecologie - Les Verts	transition to be shaped and led locally, no matter who is in office at the national level.	<p><b>Insert from line 128 to 129:</b></p> <p>transition to be shaped and led locally, no matter who is in office at the national level. <u>To avoid privatizing gains and socializing losses, this fund will rely on a significant share of financing from industries directly responsible for greenhouse gas emissions or misadaptation. For example, any project owner who artificializes land, particularly when this land has important ecological functions.</u></p>

45	AM-227-1	Europe Ecologie - Les Verts	To protect access for local communities and protect marine ecosystems, overfishing practices need to be stopped and alternative sustainable economic models for coastal communities developed. It is not just about the amount of fish we are catching but how we catch it, we will put an end to bottom trawling practices that damage everything in their wake.	<p><b>From line 227 to 231:</b></p> <p><del>To protect access for local communities and protect marine ecosystems, overfishing practices need to be stopped and alternative sustainable economic models for coastal communities developed. It is not just about the amount of fish we are catching but how we catch it, we will put an end to bottom trawling practices that damage everything in their wake.</del></p> <p><u>To halt the degradation of marine ecosystems, to protect artisanal low-impact fisheries and to be more resilient to climate change, Europe needs to end overfishing and phase out harmful fisheries practices. The Common Fisheries Policy must encourage the transition towards low-impact fisheries, fair quota distribution system and sustainable seafood consumption. This transition needs to be planned in close cooperation with the fishers across Europe. Marine Protected Areas needs to be really protected and it should be illegal to use harmful fishing techniques such as bottom trawling inside them.</u></p> <p><u>As the EU relies on imports for 70% of its sea food consumption, it is important to acknowledge the role it has to play to ensure sustainable fishing on the entire planet. We will fight for more ambitious rules at the global level in all relevant fora, promote the development of low-impact fisheries in third countries, and reduce our imports of seafood products coming from overfishing. Aquaculture can't be seen as a long-term solution to replace wild-caught seafood given its negative impact on the environmental, on fisheries, on local communities and on animal welfare. The EU needs to set high standards for the development of aquaculture and for the import of aquaculture products.</u></p>	
46	AM-231-1	SF - Green Left	fish we are catching but how we catch it, we will put an end to bottom trawling practices that damage everything in their wake.	<p><b>Insert from line 230 to 231:</b></p> <p>fish we are catching but how we catch it, we will put an end to bottom trawling practices that damage everything in their wake.</p> <p><u>The same applies to waste deposits and raw material extraction at sea.</u></p>

92	AM-634-1	Bündnis90/Die Grünen	SMEs should operate on a level playing field with large companies. We will facilitate their access to EU funding and investment programmes through simplified application procedures. With fixed quotas, we ensure that SMEs also benefit from these programmes.	<p><b>From line 634 to 637:</b></p> <p>SMEs should operate on a level playing field with large companies. We will <a href="#">review the current system of individual funds</a>, facilitate their access to EU funding and investment programmes through simplified application procedures. With fixed quotas, we ensure that SMEs also benefit from these programmes. <a href="#">In order to achieve a level playing field for SMEs we strive to avoid unnecessary bureaucracy, simplify existing regulation and ensure that new regulation is flexible and digital. We want to help Europe keep the edge in a rapidly changing technological and economic environment. Therefore we want to reinforce the successful Horizon Europe fund fostering the development of new technologies and facilitating their transfer into real life applications. This can help economic growth and improve the quality of life of citizens. As part of this approach, we want to improve the conditions for start up companies.</a></p>
